OF FAST MOVING PARTS**

**SIMPLE OPERATION AND MAINTENANCE
DUE TO GOOD ACCESSIBILITY**

**SHORT CHANGE-OVER TIME
FOR VARYING BAG DIMENSIONS**

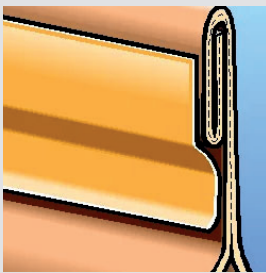

FOLD, TAPE, SEAL OF PAPER BAGS

TYPE OF CLOSURE

DOUBLE FOLD SECURED WITH SEALING TAPE

Paper bag with
or without PE inner liner

STRIPPABLE BAGS WITH APPROPRIATE GLUEING OF THE BAG LAYERS

Easy opening by means
of the tear strip

STRIPPABLE BAGS

Easy removal of outer paper plies,
leaving a still hermetically closed,
clean plastic inner bag

The FTS-closure can be opened without any tool and damage of the bag by means of a tear strip. Therefore contamination of the content with shreds of paper is impossible. The bag content is poured out over a clean edge, protected against contamination inside the folding for the whole duration of transport and storage. The tear strip allows end user friendly packaging. Strippable bags permit 100 percent grading of the disposable bag material without any effort.
